OFFICIAL

Service Centre Demand

The volume of 101 calls and 999 call to Police Scotland this week has remained relatively static, with no significant change in demand.

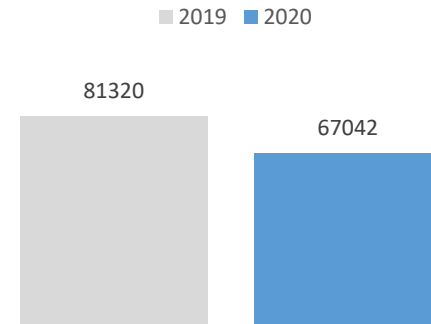

Crime Levels

Total Year to Date Crime Levels

Crime has continued to trend at levels lower than seasonal average, particularly since government restrictions were introduced. Further data is available in the Crime slide.

Total Crime (Year to Date vs Prev. Year to Date)

Coronavirus Legislation

Co-operation with new Coronavirus Legislation

The below chart is indicative of the co-operation levels experienced by Police. The majority of interactions between Police and the public are resolved without enforcement.

Incident Demand

Incident Demand Shift

Incident volume this week shows as being relatively similar levels when compared to the same time last year. There has been no significant shift in demand over the last 7 days.

Staff Absence and Welfare

Absences

From mid-March, Police Scotland's absence levels rose to higher than normal rates until the end of March. Since this date, they have steadily reduced and are returning towards absence levels closer to those seen in 2019.

Staff COVID Screening

Testing of key workers for COVID-19 continues, and the number of tests arranged for Police Scotland employees is broken down later in this report.

Total Number of Interactions Relating to Coronavirus Legislation

The below chart is indicative of the total number of FPNs issued and charges labelled since the introduction of the new legislation.

Weekly Coronavirus Legislation Co-operation (7 – 13 May 2020)

Weekly Cooperation Levels

Interaction Totals over Preceding Week

An 'interaction' is any instance where a Police Officer has reason to engage with a person who is not conforming with Legislation. Only when all efforts to encourage co-operation fail will Police Officers resort to enforcement.

Weekly Intervention Locations

Interaction Times over Preceding Week

In response to the introduction of The Health Protection (Coronavirus) (Restrictions) (Scotland) Regulations 2020 and Coronavirus Act 2020, Police Scotland developed a 'Coronavirus Interventions' (CVI) recording system. This system allowed Police Scotland to begin gathering data in relation to the public co-operation levels with the new legislation. This system relies on Police Officers manually updating the system with the co-operation level when they encounter an individual in contravention of the new legislation.

Due to the manual input required to form this data set, the contents of this slide are indicative only. Actual figures will differ from those recorded on Crime Systems (please see slide 11), may be subject to change, and cannot be considered Official Police Statistics. They do provide an indication of the public co-operation levels across Scotland.

'Enforcement' of Coronavirus specific legislation

The following is a summary of all 'enforcement' action in relation to both The Health Protection (Coronavirus) (Restrictions) (Scotland) Regulations 2020 and Coronavirus Act 2020.

This includes all Fixed Penalty Notices issued and processed by Police Scotland. It also includes all occasions that a charge was libelled and recorded on Police Scotland's Crime Recording System against a person in relation to the aforementioned legislation. This is a true value of the volume of recorded 'enforcement' activity, but does not provide the granularity of the Coronavirus Intervention (CVI) recording system and does not capture the earlier phases of the '4 E's' approach.

These values remain subject to change as offences are retrospectively added or amended and do not match the indicative 'enforcement' values from the CVI recording system.

COVID-19 Screening Tests Arranged

COVID-19 related 'Near Miss' Forms submitted

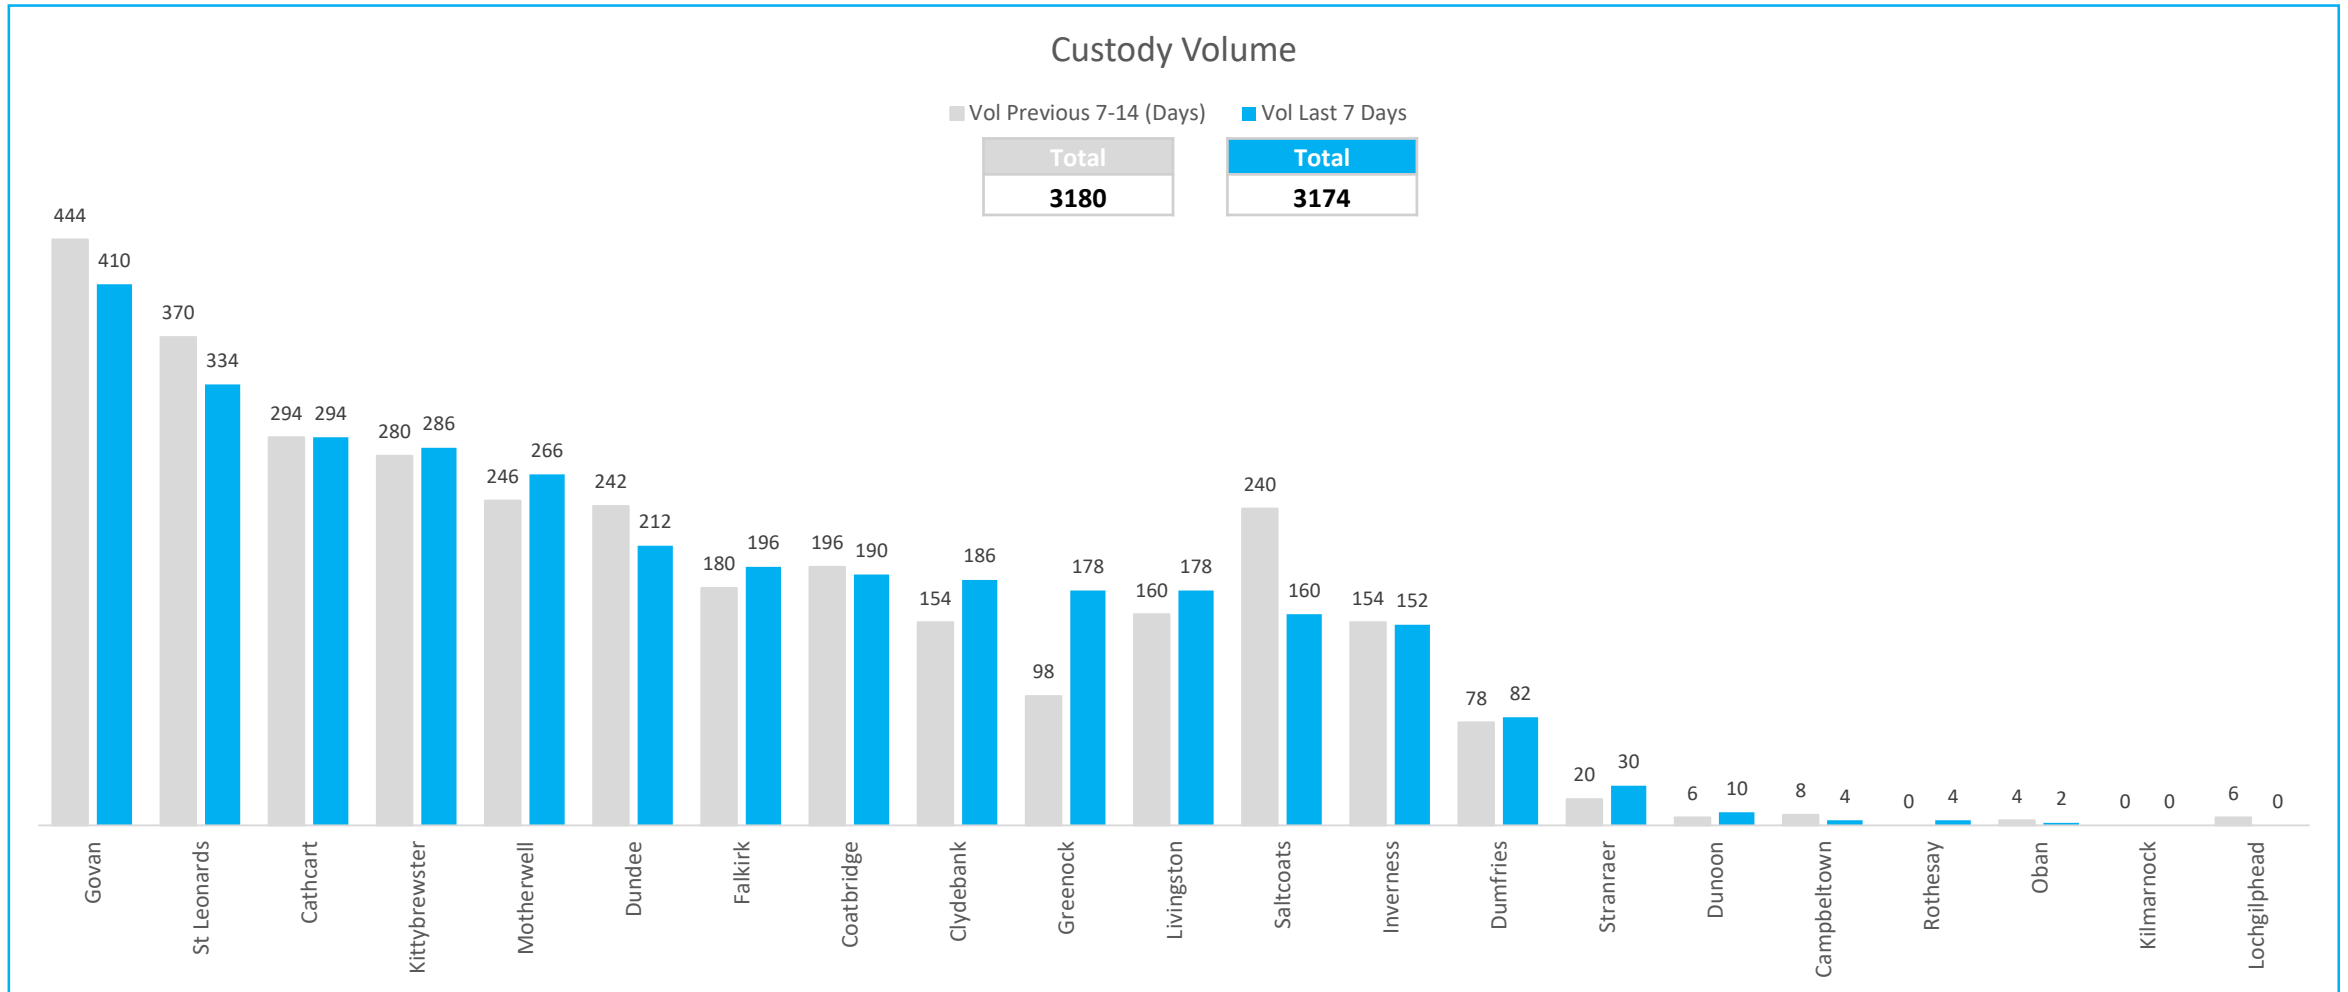

'Near miss' forms in the context of the pandemic situation may be submitted for a variety of reasons i.e. when officers are potentially exposed to COVID-19 whilst not wearing PPE, where PPE malfunctions, or in any other instance an officer feels a risk to themselves in a specific occurrence relating to COVID-19. This can occur due to the reactive nature of Policing, as well as being influenced by training levels and supply of PPE. The number of these forms has dropped as training and PPE levels increase.

Custody Volume

The below bar chart displays the custody volume in each custody centre weekly. In this chart the blue bar represents the volume over the last 7 days (7-13 May 2020), and the grey bar represents the 7 days prior to that. As can be seen, custody volume has remain static over the last 2 weeks.

Custody Volume

The below bar chart displays the total custody volume over time. As can be seen, the number of custodies fell on the approach to 'lockdown', reaching their lowest level on 29th March. Since that date Custodies have steadily increased.
