EXPLANATORY NOTES ON MANAGEMENT INFORMATION

This report contains Police Scotland Management Information for the year 1 April 2013 to 31 March 2014 (unless otherwise stated). These data are not official statistics. National Statistics on recorded crime are scheduled to be published by the Scottish Government in the autumn.

All statistics are provisional and should be treated as management information. All data are provided by Police Scotland, extracted from Police Scotland internal systems (ScOMIS) and databases, and are correct at the published date on the report.

The management information relating to crimes and offences in this report is recorded according to guidelines in the Scottish Crime Recording Standard (SCRS) and Scottish Government counting rules. Road traffic collisions recorded by the police are recorded according to guidelines issued by the Department for Transport. Data relating to stop and search are sourced from an internal reporting system. Incident data are extracted from legacy Force command and control systems.

Each separate crime/ offence is categorised under the national classifications and grouped together for ease of reference. The recording of road traffic collisions is determined by the severity of the injury sustained by the most seriously injured casualty.

Several crimes and offences may be recorded during an incident, e.g., a house may be broken into and property stolen, the premises vandalised and the householder assaulted. Three separate crimes would be recorded in this case. The system is based on the number of actual crimes/offences rather than on the number of incidents.

A crime/ offence may have more than one victim and may also involve more than one offender. A crime or offence is regarded as having been detected where there exists a sufficiency of evidence under Scots Law to justify consideration of criminal proceedings.

Many offences, e.g., speeding or possessing drugs, have no direct victim and are detected and recorded as a result of police activity.

This management information does not reflect the total incidence of crimes/offences or road traffic collisions as not all incidents are reported to the police.

Stop and search data presented in this report is based entirely on Police Scotland management information. When Police Scotland was established, a new data collection system was established to ensure consistent recording of these data.

Since the creation of Police Scotland there has been a major investment in the recording of domestic incidents; with a new Vulnerable Persons Database (VPD) rolled-out across the Force. Over the course of the last 12 months there have been changes in some parts of the Force area as to how domestic abuse data is recorded to achieve consistency. This is likely to impact on the baseline comparator data as recording improves.

The comparator being utilised for crime Groups 1 to 5 are based on the data published by the Scottish Government (http://www.scotland.gov.uk/Publications/2013/06/9697/0) in June 2013.

Figures relating to groups 6 and 7 have been presented for 2013-14 only. Police Scotland is currently working with the Scottish Government on known anomalies in the data for groups 6 and 7. In the interim, we do not recommend that comparisons are made of figures for groups 6 and 7, with data for previous years. We also await the National Statistics on police recorded crime in Scotland in 2013-14, which are due to be published by the Scottish Government in the autumn.

Small numbers. Please note that some of the data presented in this report, because it is disaggregated to Council Area level, may result in "small numbers”. Where this occurs great care should be taken in the interpretation of percentage changes.

The populations used in the calculation of rates presented in this document are the mid-year 2012 and 2013 data published by the National Records of Scotland (http://www.nrscotland.gov.uk/).

CONVENTIONS

x = Data incomplete or not available. - = Nil (zero).

FURTHER INFORMATION

If you require further information about any of the data published in this document, or any other data recorded by Police Scotland please visit our Access to Information page (http://www.scotland.police.uk/access-to-information/). Alternatively, you may write to:
