#### **A. Summary of Analysis / Decisions - What the assessment found and actions already taken.**

The APP sets out how Police Scotland will deliver policing over the period 1 April 2021 – 31 March 2022 and is aligned to:

- Joint Strategy for Policing (2020): Policing for a Safe, Protected and Resilient Scotland,
- Deputy Chief Constable/Deputy Chief Officer Delivery Plans
- Local Police Plans
- Local Outcome Improvement Plans
- Performance Framework

The APP was developed following engagement with both internal and external key stakeholders. Public engagement was carried out via the 'Your Police' survey. The survey is hosted on the Citizen Space online survey platform and widely advertised across Police Scotland's social media platforms and website. Internally, details of the consultation were also advertised on the intranet. The survey was launched in April 2020 and has had over 30,000 responses. The online survey does not have an end date, and will continue to be open to measure and improve our understanding of public confidence in policing, feeling of safety and concerns about crime in local areas. The survey can be amended to include thematic and timeous questions when the need arises. Questions relating to the development of the Annual

Police Plan were added in February 2021. The questions were added to elicit views on Police Scotland's plan for the coming year, and to assess the acceptability of the approach and content of the plan.

Accessibility of the APP was considered to provide and increase access for when the Plan is published. Details are provided in the Plan of how various groups can request alternative formats.

The APP provides information on the priorities for policing during the period 1 April 2021 to 31 March 2022. The priorities are determined by national outcomes, Scottish Government strategic policing priorities, and a national assessment of threat, risk and harm along with the outcomes of internal and external engagement.

The APP includes activities which relate to Police Scotland's equality outcomes. Police Scotland has engaged with activity owners highlighting the role of the associated EqHRIA in planning, through to reviewing of all activities. Engagement with activity owners will continue to ensure the activities' impacts are monitored and reported on throughout the year through existing and enhanced governance processes.

The APP will have a positive impact on communities as it articulates Police Scotland's priorities and the outcomes we aim to achieve for the people of Scotland. Delivery of specific activities set out within the APP will enhance the service Police Scotland provides to the public and communities and contribute positively towards equality outcomes.

**B. Summary of Mitigation Actions - What else we plan to do and how we are going to check that it has been done.**

Activities relating to equality outcomes will be monitored and managed by activity owners of their impact on protected groups. Police Scotland leadership will be provided with a summary of the EqHRIA and informed on the requirement to consider equality and human rights more widely as they implement activities to deliver on the APP and develop additional EqHRIAs where an impact is highlighted.

Equality reporting is embedded into the tracking and governance arrangements for the APP. We will report on progress to deliver against the Equality Duty through the performance framework and the national quarterly reporting process. A new APP will be produced in 2022.
