Business Continuity Management Policy

The Police Service of Scotland (PSoS) recognises that Business Continuity Management is integral to Risk Management Procedures and supports emergency planning. This provides the overall framework within which the Service can comply with the Civil Contingencies Act 2004.

PSoS shall align its Business Continuity Management System with the International Standard BS ISO 22301:2012, (Societal Security – Business Continuity Management Systems – Requirements). The Standard sets out the process and principles of Business Continuity Management and enables PSoS to measure its Business Continuity Management capability in a consistent and recognised manner.
