Date: 26th August 2022

FREEDOM OF INFORMATION (SCOTLAND) ACT 2002

I refer to your recent request for information which has been handled in accordance with the Freedom of Information (Scotland) Act 2002.

For ease of reference, your request is replicated below together with the response.

For each month of the past two years, what was the average response time for instances of physical and/or verbal abuse towards a retail worker in each local authority?

In response to this question, I regret to inform you that I am unable to provide you with the information you have requested, as it would prove too costly to do so within the context of the fee regulations.

As you may be aware the current cost threshold is £600 and I estimate that it would cost well in excess of this amount to process your request.

As such, and in terms of Section 16(4) of the Freedom of Information (Scotland) Act 2002 where Section 12(1) of the Act (Excessive Cost of Compliance) has been applied, this represents a refusal notice for the information sought.

By way of explanation, I have interpreted 'response time' as meaning the time taken from an incident being created to a resource arriving at the scene. Incidents are raised where it is assessed that some form of police response is required. This can be in response to contact by telephone or any other means, or at the request of officers or partners.

It is also worth noting that an incident will have the most appropriate grade applied regardless of whether it is received via 999, 101 or any other channel.

STORM Unity is the system used by Police Scotland for the management of police incidents and resources and is the source of the data provided in this response. It is worth noting that STORM is primarily a command & control system and has limited value as a statistical tool.

Most data obtained from the system requires further analysis to establish context. In large volumes, this can be extremely difficult to do and in some cases it is not possible to filter or structure data to adequately answer a specific request.

STORM automatically captures timing data when an incident is raised and dispatched. The arrival of a resource at the locus of an incident is recorded via a manual process and as a result is open to error.

OFFICIAL

The most common method of marking 'At Scene' is for officers to select a hotkey on their airwave device. This is often overlooked, particularly when officers arrive at the scene of a dynamic incident. Controllers are able to manually update the status of resources if required but this can naturally lead to errors in the accurate recording of the actual time of arrival. The priority of all staff is the safe and effective management of our policing response.

From previous reviews of data of this type, numerous errors in the accurate recording of this information have been identified. These include:

- Officers failing to update their handsets to mark themselves 'At Scene' when they actually arrived at locus. In some cases this was completed after a significant delay and in others the status was not updated until the incident was closed some time later.
- Incidents which were initially, appropriately, assessed at a lower response level but later reassessed and upgraded in response to new information. In these circumstances the timer does not reset, but reflects the total time from creation to dispatch/arrival.

These scenarios distort overall figures meaning that a manual review of several million incidents would be required to remove erroneous results and establish the true 'response time'.

Additionally, there are around 1.5 million incidents recorded on STORM each year, and whilst these can be narrowed down by incident classification, they cannot be broken down by crime type and so many categories, such as disturbance etc. would be potentially relevant and would require individual assessment to determine the circumstances.

As such, this is an exercise I believe will greatly exceed the cost threshold set out within the Act.

Should you require any further assistance please contact Information Management Dundee, quoting the reference number given.

If you are dissatisfied with the way in which Police Scotland has dealt with your request, you are entitled, in the first instance, to request a review of our actions and decisions.

Your request must specify the matter which gives rise to your dissatisfaction and it must be submitted within 40 working days of receiving this response - either by email to foi@scotland.police.uk or by post to Information Management (Disclosure), Police Scotland, Clyde Gateway, 2 French Street, Dalmarock, G40 4EH.

If you remain dissatisfied following the outcome of that review, you are thereafter entitled to apply to the Office of the Scottish Information Commissioner within six months for a decision. You can apply [online](#), by email to enquiries@itspublicknowledge.info or by post to Office of the Scottish Information Commissioner, Kinburn Castle, Doubledykes Road, St Andrews, Fife, KY16 9DS.

Should you wish to appeal against the Office of the Scottish Information Commissioner's decision, there is an appeal to the Court of Session on a point of law only.

OFFICIAL

As part of our commitment to demonstrate openness and transparency in respect of the information we hold, an anonymised version of this response will be posted to the Police Scotland Freedom of Information [Disclosure Log](#) in seven days' time.
