Keeping people safe

# Specialist Services

## Introduction

Police Scotland support our operational front line staff with a host of specialist, highly skilled resources, to ensure the most effective response. We have to have the capacity to respond, and escalate this response, to any critical or major incident in Scotland.

This area is extremely wide ranging and highly specialised, we have successfully delivered bespoke and standard courses in most disciplines to partners, law enforcement agencies and individual groups both at home and abroad.

## Capability

We can work with you to develop a single course or a suite of interventions to meet your specific needs, if need be, over an extended period.

We provide specialist training in various disciplines such as Dive & Marine, Dogs, Horses, Search, Mountain Rescue, Public Order, Driver Training and Road Safety. Each specialist area has a wide range of training available.
