Community Safety

Introduction

Community Safety and Crime Prevention is an on-going and ever evolving area of training and is aimed at building capacity to prevent and disrupt criminal activity both physical and social.

Community Safety & Crime Prevention are not the charge of Police Scotland alone. We work effectively with partners to deliver training which is as relevant to statutory bodies as it is to private industry and third sectors.

Capability

We deliver a number of courses and seminars for clients through Crime Prevention training, Architectural Liaison, Restorative Justice, Drugs Education, Standard and Strategic Community Safety courses.

We can work with partners to develop and tailor interventions to suit individual circumstances, e.g. personal safety advice for groups.
